

 **QUANTUM NAVIGATOR -
QUICK SETUP GUIDE**

Step 1: Switch to Heikin Ashi Candles/Chart

1. Open TradingView and load trading symbol for NQ or ES (minis or micros)
 2. Right-click on the chart
 3. Select "Heikin Ashi" from the chart type menu
4. Or click the chart type dropdown at top and select "Heikin Ashi"

**** ⚠ CRITICAL: ****

Strategy only works on Heikin Ashi charts!

Step 2: Add Quantum Navigator

1. Click "Indicators" button at top of chart

2. Go to "Invite-only scripts" tab

3. Find "Quantum Navigator v1.8 (Enhanced 1-24-2026)"

4. Click to add to chart

Step 3: Clean Up Chart (Remove TradingView Trade Markers)

- 1. Click on "QN v1.8" strategy name at top left of chart**
- 2. Click the gear icon (settings)**
- 3. Go to "Style" tab**
- 4. UNCHECK this box: - Trades on Chart**
- 5. Click "OK"**

Why? This removes TradingView's default trade markers so you only see Quantum Navigator's clean signals.

Step 5: Add Supporting Indicators (Optional)

You also have access to:

QN ATR/MFI Indicator:

- Shows momentum strength (green/red/gray bars)
 - Add to separate pane below main chart

QN Volume Indicator:

- Shows volume with relative volume analysis
 - Add to separate pane below main chart

Your Chart Should Now Show:

Entry Signals:

-  Orange diamond at exact trigger price
 - "BUY @ price" or "SELL @ price" label
 - Small triangle below/above bar
- Background turns lime (long) or red (short)

Active Trade Display:

-  Red line = Stop loss
-  Green dashed lines = Targets (T1, T2, T3)
-  Trade tracker box (bottom-right) = Live P&L and distance to targets

When to Enter Trades

- Wait for orange diamond + buy/sell label
- Enter at the price shown or as close to as possible
 - Set your stop at the red line
 - Targets shown as green lines

Trading Guidelines

NY Session: 9:30am - 4:00pm ET

Asia Session: 6:00pm - 9:00pm ET

Best Timeframes:

1-minute (active scalp trading)

5-15 minute (longer intra-day swing trading)

Position Sizing:

- Start with 1 contract
- Scale up as you gain confidence
- Respect your prop firm's risk limits!

Prop Firm Setup (Recommended)

Why use a prop firm?

- Trade with their capital (not yours)
- Only risk evaluation/monthly fee
 - Keep 80-90% of profits
- Max risk: \$2,000 daily limit (QN max drawdown: ~\$900)

Recommended Firms:

- TopstepTrader (topsteptrader.com)
- Apex Trader Funding (apextraderfunding.com)
- TakeProfitTrader (takeprofittrader.com)

Cost: \$100-300/month evaluation fees (w/o deals)

Important Notes

DO:

- ✓ Use Heikin Ashi charts only
- ✓ Trade NQ/ES/YM (futures)
- ✓ Follow all signals and trust the system
- ✓ Respect the stop loss lines
(you will take losses, keep them managed)

DON'T

- ✗ Use on regular candlestick charts
- ✗ Trade other instruments (may work fine but not optimized)
- ✗ Override stops emotionally
- ✗ Trade outside NY/Asia sessions (lower quality)
- ✗ Share your invite with others (violates terms)

SOS Troubleshooting

"No signals appearing"

- Check you're on Heikin Ashi chart
- Check you're on correct futures symbol
- Check current time (only trades NY/Asia sessions)

"Trades on chart are confusing"

- Go to Style tab → Uncheck "Trades on Chart"

SOS Troubleshooting continued

"Trade tracker box in the way"

Settings → Trade Tracker → Adjust position or turn off

"I want to exit early"

Settings → Trade Tracker → Toggle "Close Trade Box" ON

Then toggle back OFF for next trade

Updates:

- Strategy updates automatically
- Announcements: you will receive an email with latest announcements/changes/improvements

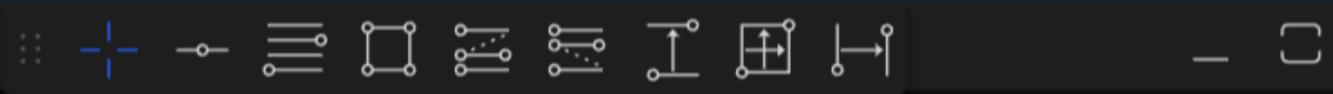

That's it! You're ready to trade.

**Remember: The strategy has made me over \$28,000 in less than
30 days with 1 NQ contract.**

**Your job is to follow the signals and manage your risk.
Let the system do the work!**

**Don't try to change anything. I trade this same strategy daily
to pull awesome money from the markets. You can too.**

*Disclaimer: Trading involves risk. Past performance does not guarantee future results.
Always use proper risk management and never risk more than you can afford to lose.*
